AGENDA

Introduction to Beef Cattle Production and Management Calendar

- Beef production calendars dictate management practices and are useful guidelines for producers of all systems and sizes.

Nutrition Basics: Body Condition Score, Nutrients, and Feeds

- Spend some time discovering how simple (and fun!) cattle nutrition and management, and selection of feeds and feeding can be

Health Management Basics: What every cow farmer should have on hand

- The world of veterinary products can be overwhelming and confusing, come to this workshop to learn what the basic "First Aid" kit for cattlemen should contain

Pasture Walk: Plant species identification; pasture scoring, rotational grazing basics

- Beef operations are centered on grass harvest (mechanical or through cattle, this cattle),this workshop will help you recognize pasture species, pasture capacity and be introduced to the basics of rotational grazing

Speaker: Alfredo DiCostanzo, Professor, Department of Animal Science
